## Mice Treatment

Date: \_\_\_\_\_

Apartment#: \_\_\_\_\_

Dear Resident:

Please clean the home prior to the pest control visit, this will help eliminate any competing food sources and provide a better product application.

1. Be prepared to vacate the property (pets included etc.) as soon as treatment begins. You may return after 1 hour. Notify Technician of small children or pets.
2. Remove **everything** from the bottom cabinets in the kitchen and bathroom: dishes, food, and other small items or appliances. This will allow us to inspect and treat more areas.
3. Clean all floors with a cleaner and vacuum any carpeted floors and rugs.
4. All appliances (stoves, refrigerators, microwaves, and toasters) and surrounding areas must be cleaned to eliminate possible mouse food sources.
5. Always keep garbage in closed containers and take out the garbage every night.
6. All dishes should be cleaned at the end of each day.
7. Remove all items on the top of the stove and refrigerator and the surrounding areas around them.
8. There should be a clear path of access for the exterminator to inspect and treat any areas where pests have been seen.
9. Any harborage areas (stored items) should be removed from the areas of activity before treatment to eliminate any areas where the rodents could hide and to allow enough space for the exterminator to inspect all areas and safely perform the treatment.
10. Store dry food goods (rice, flour, cereals, pasta, and other snacks) as well as pet food in rodent proof containers, such as metal/ plastic containers or move these items to higher shelves where mice cannot get into them.
11. Please DO NOT use any other pesticides or self-treatments in your apt/home prior or during treatment.
12. PLEASE LEAVE ALL BAIT STATIONS ALONE.

Thank you for your cooperation from Pronto Pest Management!
